

TRUTHFULNESS SCALE: LOW RISK RANGE RISK PERCENTILE:27  
This youth's response pattern on the Truthfulness Scale is in the Low Risk (zero to 39th percentile) range. This is an accurate ACDI profile and other ACDI scale scores are accurate. This youngster responded to ACDI items in a non-defensive, cooperative and truthful manner. Denial, minimization and distortion are minimal. This youth was truthful and did not conceal self-report information.

ALCOHOL SCALE: PROBLEM RISK RANGE RISK PERCENTILE:89  
This youth's Alcohol Scale score is in the Problem Risk (70 to 89th percentile) range. Alcohol-related problems are indicated. This troubled youth likely has a drinking problem or is a recovering (alcohol problem, but does not drink anymore) alcoholic. This youth might be interviewed closely regarding a history or pattern of drinking. A pattern of alcohol abuse is likely. Alcohol-related treatment may be warranted.

ADJUSTMENT SCALE: MEDIUM RISK RANGE RISK PERCENTILE:58  
This juvenile's response pattern on the Adjustment Scale is in the Medium Risk (40 to 69th percentile) range. Adjustment problems appear to be emerging. This troubled youth admits to some adjustment problems and concerns. Review this youth's school records (attendance, grades, conduct), juvenile court history, and family situation. This adolescent would benefit from clearly understood expectations and consequences.

DRUGS SCALE: PROBLEM RISK RANGE RISK PERCENTILE:71  
This juvenile's Drugs Scale score is in the Problem Risk (70 to 89th percentile) range. This adolescent's response pattern indicates the presence of drug-related problems. Either this youth has a drug problem, or is a recovering (drug problem, but does not use anymore) drug abuser. Interview this juvenile regarding history and pattern of substance abuse. Risk of problematic drug abuse is present. If an accurate ACDI test, then drug problems are present.

DISTRESS SCALE: MEDIUM RISK RANGE RISK PERCENTILE:65  
This juvenile's Distress Scale score is in the Medium Risk (40 to 69th percentile) range. Medium risk scorers may reflect growing unhappiness, anxiety and discouragement. If talking with this youth about experienced distress does not help, then consideration might be given to counseling (individual, group or family). This adolescent's life situation is likely contributing to the experienced distress.

SIGNIFICANT ITEMS: The following self-report responses represent areas that may help in understanding the troubled youth's situation. Significant items are either direct admissions or unusual answers that may warrant further inquiry in interview.

ALCOHOL

- 17. Drinking problem in last year
- 27. Two or more memory losses
- 52. Needs help to control drinking

DRUGS

- 9. Favorite drug is pot or coke
- 59. Admits using and abusing drugs

ADJUSTMENT

No significant items were reported for this scale.

DISTRESS

- 58. Parents don't trust respondent

MULTIPLE CHOICE (JUVENILE'S SELF-REPORT): It is the youth's opinion with all its biases, that is most relevant for the initiation and maintenance of counseling or treatment. The following statements represent the youth's answers to items 98 through 105.

- 98. No family problems reported
- 99. Drinking is a little problem
- 100. Drug use is a little problem
- 101. Not suicidal or homicidal
- 102. Little motivation for alcohol treatment
- 103. Little motivation for drug treatment
- 104. Distress a little problem
- 105. Little motivation for help
